AI Assurance Retainer

Protect performance. Maintain standards. Sustain value.

The Challenge

AI systems change over time, and without structured oversight, performance, governance, and value can gradually erode unnoticed. Key challenges include:

- Model performance declining as data evolves
- Bias, compliance, or safety risks emerging silently
- Vendor updates altering cost or capability
- Governance documentation falling out of date
- ROI diminishing as workflows revert

The Solution

The AI Assurance Retainer provides structured, ongoing oversight to protect model health, governance integrity, and realised business value. Our approach includes:

- Scheduled performance and drift monitoring
- Regular governance and compliance audits
- Vendor performance and commercial oversight
- Value tracking against original business case
- Board-ready reporting cadence

The Outcome

Sustained confidence that deployed AI remains accurate, well governed, commercially controlled, and aligned to organisational purpose. This delivers:

- Continuous visibility of model health
- Audit-ready governance documentation
- Reduced exposure to regulatory risk
- Controlled vendor relationships and costs
- Compounding value beyond initial deployment

Our Core Services

1. ### Model Performance Reporting

   Ongoing monitoring of data drift, accuracy trends, cost patterns, and performance against initial deployment baselines.

   Ensures performance remains within defined standards

2. ### Governance and Compliance Audits

   Scheduled audits reviewing bias, safety controls, privacy safeguards, and documentation readiness against regulatory expectations.

   Maintains audit readiness and reputational protection

3. ### Vendor and Commercial Oversight

   Review of pricing changes, model updates, and service levels to ensure continued alignment with strategy.

   Protects flexibility and cost efficiency

4. ### Value and Strategy Reviews

   Periodic evaluation of realised benefits against the original business case with optimisation recommendations.

   Sustains and compounds AI return on investment

Why ITAA.ai?

- Organisational logic first, not technology led
- Independent and vendor-neutral, focused on your interests
- Governance-led, with responsible AI at the core
- Human-centred: people, capability and culture
- Senior-led delivery from Alan King and the ITAA.ai team
